Summary

Motivated and detail-oriented aspiring Full-Stack Developer currently focused on mastering the MERN stack and modern web development practices. Actively learning technologies such as React.js, Node.js, Express.js and MongoDB. Enthusiastic about building practical solutions and gaining hands-on experience in healthcare systems, and real-world web applications. Eager to contribute to collaborative projects and continuously grow as a developer.

Education

Lakshmi Narain College of Technology

Nov 2022 - Present

B.Tech, Electronics and Communication Engineering

- **GPA:** 8.43 CGPA
- **Coursework:** Data Structure and Algorithm, Operating System, Web Development, DBMS(SQL), Object-Oriented Programming

Projects

Rental Booking Platform | [LINK](#)

July 2025 - Aug 2025

- Created a Rental Booking Platform (Airbnb-like) using Node.js, Express.js, MongoDB, HTML, CSS, JavaScript, and Bootstrap for browsing, booking, and listing properties.
- Enabled property search, booking system, and listing management with an intuitive, responsive UI for hosts and guests.
- Implemented authentication/authorization with Passport.js, integrated Cloudinary for image uploads, and used MongoDB Atlas for scalable cloud storage.
- Deployed on Render with optimized hosting, ensuring high availability, real-time interactions, and future scalability.

Hospital Management System | [LINK](#)

Sep 2025 - Present

- Built a full-stack Hospital Management System using Node.js, Express, MongoDB, HTML, CSS, and Bootstrap to digitize hospital operations.
- Developed key modules for patient registration, doctor appointments, electronic medical records (EMR), and billing management.
- Implemented secure authentication and role-based authorization for admins, doctors, and patients using Passport.js.
- Utilized MongoDB Atlas for scalable, cloud-based storage of sensitive medical records with efficient and secure data management.

Skills

- **Backend Development:** Node.js, Express.js, REST APIs, Passport.js(Authentication)
- **Database:** MongoDB, SQL
- **Frontend Development:** HTML, CSS, React.js, Bootstrap, Tailwind CSS
- **Programming Languages:** Java, JavaScript
- **Tools & Libraries:** Git, GitHub, VS Code (IDE)
- **Soft Skills:** Problem Solving, Communication Skills, Time Management, Adaptability, Leadership, Attention to Detail

Achievements & Certifications

• Java Programming – Infosys Springboard

- Completed foundational to intermediate Java training covering OOP concepts, exception handling, collections, and file I/O.
- Gained hands-on experience with Java-based problem solving and object-oriented application development.

• Web Development – Infosys Springboard

- Gained proficiency in core web technologies: HTML, CSS, JavaScript, React.js, and Node.js.
- Developed static and dynamic web pages, implementing responsive design, DOM manipulation, client-server interaction, and server-side scripting concepts.

• Networking Essentials – Cisco Networking Academy

- Gained foundational knowledge of networking concepts, protocols, and best practices for building reliable and secure networks.
- Explored networking topics including IP addressing schemes, subnetting, and routing protocols, along with switching operations, connectivity setup, and troubleshooting techniques applied to real-world network environments.

Position Of Responsibility

• GirlScript Summer of Code (GsSOC) 2024 – Contributor

- Contributed to open-source projects under the GsSOC 2024 program by resolving issues, enhancing documentation, and adding new features.
- Collaborated with project maintainers and fellow contributors via GitHub and Discord, gaining hands-on experience with version control and team workflows.
- Strengthened skills in Git, GitHub, and open-source best practices while contributing meaningful code to real-world repositories.
