SUMMARY

Full-Stack Developer with expertise in Java, JavaScript, and the MERN stack (MongoDB, Express.js, React.js, and Node.js), backed by hands-on experience designing, developing, and deploying scalable web applications. Strong foundation in Data Structures & Algorithms, Object-Oriented Programming, RESTful API development, authentication, and database management. Skilled at writing clean, maintainable, and efficient code while delivering responsive and user-centric solutions. Committed to continuous learning and contributing to high-impact software development in collaborative engineering teams.

EDUCATION

Lakshmi Narain College of Technology

Bachelor of Technology in Electronics and Communication Engineering

Bhopal, MP

Nov 2022 – June 2026

- CGPA: 8.61/10

TECHNICAL SKILLS

Programming Languages: Java, JavaScript

Frontend Development: HTML, CSS, React.js, Bootstrap, Tailwind CSS

Backend Development: Node.js, Express.js, REST APIs, Passport.js (Authentication), Mongoose

Databases: MongoDB, SQL

Tools & Libraries: Git, GitHub, VS Code (IDE)

Core Concepts: Object Oriented Programming (OOP), DBMS

Soft Skills: Problem Solving, Analytical Thinking, Communication Skills, Time Management, Adaptability, Leadership

PROJECTS

Rental Booking Platform | GitHub

JavaScript, Bootstrap, Node.js, Express.js, MongoDB, Passport.js

- Developed a full-stack Rental Booking Platform using Node.js, Express.js, MongoDB, HTML, CSS, JavaScript, Bootstrap, and EJS, enabling users to browse, book, and manage rental properties.
- Built RESTful APIs and implemented CRUD operations for property listings, bookings, reviews, and user management, ensuring seamless client-server communication.
- Integrated Passport.js Authentication, role-based authorization, Cloudinary for secure image uploads, and MongoDB Atlas for scalable cloud database management.
- Deployed the application on Render, optimizing performance, responsive design, and application scalability while following MVC architecture and industry-standard development practices.

Employee Management System | GitHub

React.js, Node.js, Express.js, MongoDB, Tailwind CSS, JWT

- Developed a full-stack Employee Management System using React.js, Node.js, Express.js, MongoDB, Tailwind CSS, and JWT Authentication, enabling secure and scalable employee data management.
- Implemented JWT-based authentication and role-based authorization to provide secure user login, protected routes, session management, and access control for administrators and employees.
- Designed and integrated RESTful APIs for performing CRUD operations (Create, Read, Update, Delete) on employee records, ensuring efficient backend communication and optimized database performance with MongoDB.
- Built a responsive and user-friendly interface with React.js and Tailwind CSS, incorporating state management, form validation, and dynamic dashboards to enhance user experience and application performance.

CERTIFICATIONS

Java Programming – Infosys Springboard

- Built a strong foundation in Java programming, Object-Oriented Programming (OOP), Exception Handling, Collections Framework, File I/O, Multithreading, Debugging, and Problem Solving, applying object-oriented principles to develop efficient and maintainable applications.

SQL – HackerRank

- Validated proficiency in SQL through the HackerRank SQL (Intermediate) certification, demonstrating expertise in complex queries, joins, subqueries, aggregate functions, data manipulation (DML), and relational database management.

ACHIEVEMENTS

- Built and deployed end-to-end full-stack web applications by integrating frontend, backend, authentication, and database technologies to deliver scalable and user-centric solutions.
- Consistently practiced Data Structures and Algorithms (DSA) on competitive programming platforms, strengthening algorithmic thinking and problem-solving skills.
- Successfully developed and deployed industry-oriented full-stack applications while continuously upskilling in modern web technologies and balancing academic commitments.
